

Privacy Policy for EV-Charging Station Operators

In the course of making the EV-Charging Station Finder available, KELAG processes the following personal data of registered users:

- Data category A: Name/company, salutation, title, e-mail address, home address, address of EV-Charging station, geographic data to determine the location of the EV-Charging station, phone number, URL of the user's website, whether the user acts as a private person or an entrepreneur in this context, images of the charging station, information on technical characteristics of the charging station such as the number of charging points, type of connectors, level of charging power, authentication and payment options, opening hours, available parking etc. as well as an optional text field with additional information on the charging station.
- Data category B: A password that the user chooses for logging into the EV-Charging Station Finder.
- Data category C: Technical information that is automatically transmitted by the user's web browser such as the user's IP address and technical information saved in cookies. Cookies are small text files on the user's computer that the user's web browser saves on the computer. In the web browser settings, the user has the option to disable the use of cookies. This may, however, cause some components of the EV-Charging Station Finder to not work at all or to not work properly.

The user hereby consents that data listed in category A will be published on EV-Charging Station Finder websites as well as on other websites covering this subject matter in order to enable everybody to find charging stations.

KELAG is also permitted to process the data listed under category A for marketing and advertising purposes to the user as well as third parties (solicitation of all services offered by KELAG). Additionally, KELAG may transmit any data from category A to providers of navigation devices, map manufacturers, and other partners in order to help them develop and distribute products as well as provide services for localising EV-Charging stations.

Data listed under category B will only be processed to the degree necessary to allow for authentication of a user within the login process. Processing this data for other purposes or transmitting it to third parties is excluded.

Data listed under category C will only be processed to the degree necessary to create user statistics and to make the simple use of the EV-Charging Station Finder possible.

Notwithstanding any further-reaching legal rights, every user may check, correct, or delete the nature and extent of their personal information, request information to be deleted, or revoke the acceptance of this privacy policy after authentication on one of the EV-Charging Station Finder websites by means of an automated process or by means of a written notification sent to KELAG.
